DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: The invention is directed to a polymer within whose backbone are biologically active compounds that are released upon hydrolysis of the polymer. The bonds that are hydrolysable and are part of the backbone are amide linkage, thioester linkage and ester linkage and these linkages are dependent on the biologically active agent that would be released upon the hydrolysis of the linkage bond. The biologically active agents that are applicable in the invention are many as can be seen in claims 3-12. The fact that there are so many biologically active agents incorporable in the backbone means that many polymers are also claimed. R2 as claimed also has a number of possibilities as defined by claims 13-24. Many therapeutic methods are also claimed, namely, the method of claim 28, method of claim 29, method of claim 30, method of claim 31 and method of claim 32.

Therefore, applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. That is, a single disclosed polymer that is completely defined by one of the bonds recited in claim 2, one biologically active agent selected from recited and disclosed agents (see claims 3-13). One of the methods of claims 28-32 should be elected for prosecution with the elected polymer. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of **all claims readable**

Art Unit: 1618

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was not made to applicant to request an oral election to the above election requirement in light of the complexity of the election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blessing M. Fubara whose telephone number is (571) 272-0594. The examiner can normally be reached on 7 a.m. to 3:30 p.m. (Monday to Friday).
